Main Objectives, Stand Out Feature & Main Specifications/Functionality

10 February 2015   15:15

Main Objectives

1. Everything is on one page
2. Personalised food recommendation
3. Can be used by anyone

Stand Out Feature

1. Takes into account what other people have rated
2. Uses Google Maps API for menus and reviews etc.

Main Specification/Functionality

1. Takes location from user if they don't have an account
2. Recommends places based on ratings and location in relation to user
3. Gives information on the recommended place based on Google Maps API (reviews, menu etc.)
4. Stores suggestions made to user and choices made by the user in order to make sure places they don't like don't come up again, and that they don't get the same places twice in a few days - doing this by thumbs up or down, and also adding favourites or blacklisting places
5. Users can also create account to store preferences and locations, and implement (3)
